

You can't get their business until you get their attention.

With the VR-MAX experience, you get attendees, you get buzz. The sales force can count on being remembered when they follow-up. VR-MAX is the most experienced producer of high-end, immersive dome content for exhibit, trade show, and business special events, including computer-generated imagery (CGI), special effects, interactivity, and "live capture" of real people, places and products. Using specialized curved screens and proprietary production techniques, Sinard can help you create an extraordinary immersive media experience, for one person at a time or hundreds of people all at once.

Maximum impact.

Maximum memorability.

Maximum results.

VR-MAX Production

VR-MAX productions use Live Capture, Animation, or real-time Medical or Architectural Walk-thrus or Games. Budgets vary by concept. Call for specifics.

Footprint Minimum: 6' x 5'5' Carpeted surface preferred.
Electrical Requirements: One 110v

Custom Domes, Planetariums, Full Domes, FakeSpace CURV

Custom productions for specialty screens? Call for details.

All Systems

Budgets vary with concepts. All domes require very dark environments. All systems include screen & projector, but due to the wide variance in customer requirements audio, computer, video or other playback systems are not included and are optional. Setup/teardown, Shipping, drayage, etc. paid by Lessee.

The planetariums, domes, curved screens and other immersive environments described herein are major-impact projection systems, requiring special production techniques and/or software. We cannot allow the projection of imagery that was not created for a dome screen, which could appear distorted and damage our brand. This is our specialty. Please call with questions.

VR-MAX is a division of Sinard Inc. VR-MAX is not affiliated with IMAX®, its subsidiaries or the independently operated IMAX® theaters. The IMAX® Dome is referred to herein for purposes of comparison and contrast, as it is also distinguished by a pronounced curve (dome) screen.
